WEEK 1

- INTRODUCTION TO SCHOLARLY WRITING

Third Edition
Academic Writing
A Handbook for International Students
Stephen Bailey

Outline

Outline

- Academic Discourse Community
- The nature of Scholarly Writing

- Features of Scholarly Writing

- Importance of Good Scholarly Writing Skills

The Academic Discourse Community

- The university may be described as an academic discourse community.
- This discourse community is different in terms of geographical location and the language peculiar to it.
- Terms which are exclusive to the university or college environment include terms such as:

“associate professor”, “credit hour”, “add/drop courses” among others.

The Academic Discourse Community II

- **Within the larger university community too, there are smaller discourse communities, which have their peculiar terms.**
- **A student who enters the university will therefore have to learn the language used in his discipline in order to use the terms appropriately**

Characteristics of Academic Writing

- It has a defined structure: an introduction, middle/main section and a conclusion
- The tone should be formal- use of chatty, slang or 'text messaging' language, contractions emotionalism etc., must be avoided.
- The passive voice is preferable
- The academic essay answers a question

- It develops a clear and sound argument

CONT'

- It provides supporting evidence for the arguments made.
- Arguments are supported by example, quotation, statistics, explanation, reference and authority
- It uses appropriate evidence and relevant examples
- It selects appropriate quotations to back up ideas

- It uses the required referencing style with accuracy
- Materials consulted in the academic essay are properly cited and acknowledged

example

The need to study traditional and modern leadership is never as critical as in the case of Africa. According to Chazan et al. (1992) "…Leadership is …one of the many guides to the intricacies of political processes on the continent". In addition, leadership is important in

defining the success (or otherwise) of *good governance*- a rare commodity on the African continent.

Features of Scholarly Writing

- Complex
- Formal
- Objective
- Explicit
- Hedged
- Responsible.
- Precision
- Complexity

Complexity

- Written language is relatively more complex than spoken language.
- Written language is lexically denser and it has a more varied vocabulary.
- Written texts are shorter and the language has more grammatical complexity, including more subordinate clauses and more passives.

Complexity II

- Halliday (1989, p.79) compares a sentence from a spoken text:
- You can control the trains this way and if you do that you can be quite sure that they'll be able to run more safely and more quickly than they would otherwise, no matter how bad the weather gets.

Complexity II

- Typical written variant:
- The use of this method of control unquestionably leads to safer and faster train running in the most adverse weather conditions. The main difference is the grammar, not the vocabulary.

- The main difference is the grammar, not the vocabulary

EXAMPLE

Spoken	Written
Because the technology has improved its less risky than it used to be when you install them at the same time, and it doesn't cost so much either.	Improvements in technology have reduced the risks and high costs associated with simultaneous installation
The people in the colony rejoiced when it was promised that things would change in this way.	Opinion in the colony greeted the promised change with enthusiasm.

The cities in Switzerland had once been peaceful, but they changed when people became violent.	Violence changed the face of once peaceful Swiss cities.

Formality

- Scholarly Writing is relatively formal.
- Avoid colloquial words and expressions:
  "stuff", "a lot of", "thing", "sort of",

- b. abbreviated forms: can't doesn't shouldn't
- c. two word verbs: "put off", "bring up"
- d. sub-headings, numbering and bullet-points in formal essays - but use them in reports.
- e. asking questions

Precision

- Facts and figures are given precisely.
- You need to be precise when you use information, dates or figures.

- Do not use "a lot of people" when you can say "50 million people".

Objectivity

- Written language is in general objective rather than personal.
- It has fewer words. Emphasis on the information and the arguments you want to make, rather than you.
- Nobody really wants to know, what you "think" or "believe". They want to know what you have

studied and how this has led you to your various conclusions.

- The beliefs should be based on research

EXAMPLE

- avoid words like "I", "me", "myself".
- A reader will normally assume that any idea not referenced is your own.
- It is therefore unnecessary to make this explicit.

- Don't write:" In my opinion, this a very interesting study."
- Write: "This is a very interesting study."

EXAMPLE

- Don't write: "You can easily forget how different life was 50 years ago."
- Write: "It is easy to forget how difficult life was 50 years ago."

Explicitness

- SW is explicit about the relationships in the text.
- it is the responsibility of the writer to make it clear to the reader how the various parts of the text are related.
- These connections can be made explicit by the use of different signalling words.

- For example, if you want to tell your reader that your line of argument is going to change, make it clear

Accuracy

- You need to be accurate in your use of vocabulary.
- Do not confuse, for example, "phonetics" and "phonology" or "grammar" with "syntax".

- Choose the correct word, for example, "meeting", "assembly", "gathering" or "conference".
- Or from: "money", "cash", "currency", "capital" or "funds".

Hedging

- It is the concept of cautious language, often called "hedging" or "vague language".

- it is necessary to make decisions about your stance on a particular subject,
- or the strength of the claims you are making.
- Different subjects prefer to do this in different ways.
- Language used in hedging: certainly, definitely,
- clearly, probably, possibly

Responsibility

- You must be responsible for your claim
- Must be able to provide evidence and
- justification for any claims you make.
- You demonstrate an understanding of any source texts you use.
- This is done by paraphrasing and summarising

Importance

- Formulating Arguments: Arguments are built on each other and accumulate cohesion
- General Writing Skills: Your writing skills are strengthened through the process of putting together academic essays.
- Referencing: The material you used in the creation of the essay.

- Logical Thinking: The thinking skills you develop during the writing process will be with you forever.

READING

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

Lecture Outline

- Introduction
- Reading techniques: skimming, scanning, critical reading
- Steps to critical reading

INTRODUCTION

- The ability to read is as important today as it has ever been.

- Some people believe that the need for good basic reading skills has lessened as technology has improved.

- For example, TV and radio, with all their power and indeed their role in providing information, has reduced the need for reading.

INTRODUCTION

- Certainly, there are many people who do not buy books for pleasure and enjoyment.

- In some ways, this may not really matter. Being able to read fluently is very different from wanting to read at all.

- In so many aspects of our lives, we still need to read. Reading is a need that technology cannot replace.

READING TECHNIQUES

- As you become more confident in your reading, you can learn to apply a range of techniques in order to extract from a text or to locate information.

- Effective and efficient readers learn to use many styles of reading for different purposes.

- You need to practise the following techniques: ***Skimming, Scanning, Critical Reading.*** These are different styles of reading and information processing.

READING TECHNIQUES

SKIMMING

- Skimming is used to quickly identify the main ideas of a text. When you read a newspaper, you are probably not reading it word-by-word; instead, you are skimming the text.

- This technique is useful when you are *general idea rather than the complete meaning* of a material

READING TECHNIQUES

SKIMMING

- Use skimming when you want to see if an article may be of interest in your research.

- Skimming is done at a speed three to four times faster than critical reading. People often skim when they have lots of material to read in a limited amount of time

READING TECHNIQUES

SKIMMING

- There are many strategies that can be used when skimming.
  - Some people read the first and last paragraphs using headings, summaries and other organisers as they move down the page or screen.
  - You might read the title, subtitles, subheading, and illustrations.

– Consider reading the first sentence of each paragraph.

READING TECHNIQUES

SCANNING

- Scanning is a technique you often use when looking up word in the telephone book or dictionary.

- You search for key words or ideas. In most cases, you know what you are looking for, so you are concentrating on finding a particular answer.

READING TECHNIQUES

SCANNING

- This technique is useful when you are *seeking specific information rather than reading for comprehension*. Skimming works well *to find dates, names, and places*.

UPSA
COMMUNICATION STUDIES

- Scanning is also used when you first find a resource to determine whether it will answer your questions. Once you've scanned the document, you might go back and skim it.

UPSA
COMMUNICATION STUDIES

READING TECHNIQUES

SCANNING

- When scanning, look for the author's use of organisers such as numbers, letters, steps, or the words, first, second, or next.

- Look for words that are bold faced, italics, or in a different font size, style, or colour. Sometimes, the author will put key ideas in the margin.

READING TECHNIQUES

CRITICAL READING (effective reading)

- Critical reading is reading carefully to aid understanding.

- When reading for information, detailed reading usually follows. Texts, such as instructions, need to be read in detail throughout.

READING TECHNIQUES

CRITICAL READING

- Think about the following questions as you read:
  - What is it for?
  - Where is it coming from?
  - Who is it aimed at?
  - What can I infer that isn't explicitly stated?
  - Do I believe it?

READING TECHNIQUES

CRITICAL READING

An understanding of the concept of person and the writer's voice can be developed alongside decoding and in relation to different text types:

- Do I know who the writer is?
- Does it matter?
- Is the writer the same as the narrator?

- Is the writer a named individual or a representative of an organisation/body/authority?
- Is the writer assuming a ‘voice’ for the occasion?

READING TECHNIQUES

CRITICAL READING

In continuous texts, you can try to distinguish:

- Main points from supporting detail
- Facts from opinions
- Conflicting viewpoints
- Evidence of simplification, generalisation, manipulation, bias.

READING TECHNIQUES

- **CRITICAL READING**

Tips for critical reading

- Underline or highlighting
- Ask questions
- Evaluate the author
- Summarise
- Note key words
- Use mnemonics
- Using graphical organizers to organise text

READING TYPES

- **CRITICAL READING**

Tips for critical reading

- Underline or highlighting
- Ask questions
- Evaluate the author
- Summarise
- Note key words
- Use mnemonics
- Using graphical organizers to organise text

STEPS FOR CRITICAL READING

- To be able to read more efficiently, three key steps must be followed: ***Preview – Read – Recall*** **(P2R)**

- At first glance, going through these steps seems to be an intricate/complicated and time consuming process.

- However, it gets easier and faster with practice thorough learning and it later facilitates “relearning” when you are revising for exams.

STEPS TO CRITICAL READING

PREVIEW

Why Preview?

- If you give your mind a general framework of main ideas and structure, you will be better able to comprehend and retain the details you will read later.

STEPS TO CRITICAL READING

How To Go About The Preview?

1. Look quickly over the following key parts of your textbook to see what it's all about and how it is organised. Look out for:
   - Title
   - Front and back cover information
   - Author's biographical data
   - Publication date
   - Table of Contents
   - Introduction or preface
   - Index
   - Glossary

STEPS TO CRITICAL READING

How To Go About The Preview?

2. Before you read each chapter, look over the:
   - Title
   - Introduction
   - Sub-headings
   - First sentences of each paragraph (should give main idea).
   - Any diagrams, charts, etc.
   - Conclusions or summaries

STEPS TO CRITICAL READING

- **How To Go About The Preview?**

3. Then answer the following questions:
   - What is the book mainly about?
   - How is it organised?
   - How difficult is it?
   - About how long will it take to read?

STEPS TO CRITICAL READING

READ

After previewing, read actively.

- **WHY READ ACTIVELY?**
- Being an active reader will help you to understand the material, combat boredom, and will increase retention.

STEPS TO CRITICAL READING

HOW TO READ

- 1. Set realistic time goals and number of pages to be read.

- 2. Divide your chapter into small (1/2 page, 1 column) sections, rather than read the whole chapter non-stop.

STEPS TO CRITICAL READING

HOW TO READ

- 3. Ask yourself a question before each paragraph or section, then look for its answer.

- This will give you a definite purpose for your reading.

- Try turning the sub-heading or first sentence into question form, using “ who ”, “ what ”, “when ”, or “how” if necessary.

STEPS TO CRITICAL READING

HOW TO READ

- 4. Take breaks when you feel unable to stay with the material due to day-dreaming, drowsiness, boredom, hunger etc.

- After a short break, you can return to your reading with more energy and alertness.

STEPS TO CRITICAL READING

RECALL

- After reviewing and reading, ‘recall’ the information you have read

Why Recall?

- Research shows that 40-50% of material we read is forgotten very shortly (about 15 minutes) after we

read it. Immediate recall is an essential first step toward continued retention of the material.

-

STEPS TO CRITICAL READING

How Do You Recall?

- After reading each small section of material, choose one (or more) of the following methods:

- Recall mentally or recite orally the highlights of what you have read.

- Ask yourself questions (maybe the same ones you used before you read the section) and answer them in your own words.

UPSA
COMMUNICATION STUDIES

STEPS TO CRITICAL READING

How Do You Recall?

- Underline and make notes in the margin of the key words or phrases in the section. It is the best way to decide what's the most important information to remember.

- Make separate notes or outlines of what you have read.

- Recall with a friend . What you don't recall, he/she might.

STEPS TO CRITICAL READING

OTHER STEPS

- Various authors have suggested other steps to aid critical reading.

- These steps are generally similar to the P2R. However, some of the ideas presented as one idea in the P2Rs are further divided.

- Some of these steps are the

- SQ3R (survey, question, read, recite and review)
- PQ4R (preview, question, read, reflect, recite, review)

WEEK 2

NOTE-TAKING

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

Lecture Outline

- Definition
- Tips
  - Before Class
  - During Class
  - After Class
- The Cornell Method
- Conclusion

DEFINITION

- “Note-taking is a process that involves writing or recording what you hear or read in a descriptive way.” ((Neville, 2006)

DEFINITION

- **NOTE-TAKING AND NOTE-MAKING**
- "Note-making is an advanced process that involves reviewing, synthesizing, connecting ideas from the lecture or reading and presenting the information in a readable, creative way that will stick in your mind" (Neville, 2006).

REASONS WHY WE TAKE NOTE

We take notes to aid:

- **Summary** – Taking note helps us to present an overview of a topic.
- **Memory** – Notes serves as retention aids of information.
- **Revision** – Notes form the basis for effective revision
- **Concentration** – Note-taking is an active process. Therefore, it keeps one engaged so that one is not easily distracted.
- **Active Listening-** Note-taking promotes active listening

TIPS FOR EFFECTIVE NOTE-TAKING (before class)

Prepare

- What do you already know?
- Read about the topic to get a general idea
- What questions do you intend to answer from the lecture

TIPS FOR EFFECTIVE NOTE-TAKING (during class)

- Keep it **brief** and to the point – focus on what is important. You do not need to write everything.

- Use **symbols** & **abbreviations** – Use conventional abbreviations.
- However, you can also use your own developed ones. Make sure you can remember them.

TIPS FOR EFFECTIVE NOTE-TAKING (during class)

Useful abbreviations for note-taking

& or +	and/ in addition to
>	greater/ more/ better than
<	less/fewer/smaller than
=	equal to/ the same as
≠	not the same as
δ	small change
Δ	large change
∴	therefore
∵	because
♂	male/ man
♀	female/ woman
→	leads to/ produces/ causes
↓	decreasing/ reducing etc.
↑	increasing/ upwards trend etc.
~ or c.	approximately, around

w/	with
wrt	with respect to
e.g.	for example
i.e.	that is, that means
etc.	and so on
p.	page, pp. = pages
para.	paragraph
info.	Information
X	trans... e.g. transfer = Xfer, translate = Xlate
xxx^n	xxxtion e.g. education = $educ^n$, or combined with above transformation = $Xform^n$
cd	could
wd	would
xxx^t	xxxment or xxxant, so government = gov^t, important = imp^t
C	century i.e. 19C = 19th century

TIPS FOR EFFECTIVE NOTE-TAKING (during class)

Use signal words and keywords

- Think about lecture plan, course outline headings, text book pages etc.

- Use terms such as in conclusion, summary, most important, firstly, main, critical, not important to signal important points in your notes

TIPS FOR EFFECTIVE NOTE-TAKING (during class)

- **Mark items in your notes which needs a followup**
  - Ideas, facts or concepts which you don't understand/ with which you agree or disagree.
  - The difference between facts and opinions.
  - Note any questions or comments that occur to you whilst listening/reading. (You can ask your lecturer during question time)

– Note if there is a gap in your knowledge.
– Terms used that you do not understand.

TIPS FOR EFFECTIVE NOTE-TAKING (during class)

Organise your notes

- Use headings, underlining, capitals and colouring to organise your notes to distinguish topic, main headings, sub headings and so on
- Use bulleting or numbering
- Use diagrams, tables, graphics to make ideas clearly

- Leave good margins so you can add additional notes, thoughts or questions [this can be in square brackets to separate them that of your lecturer]

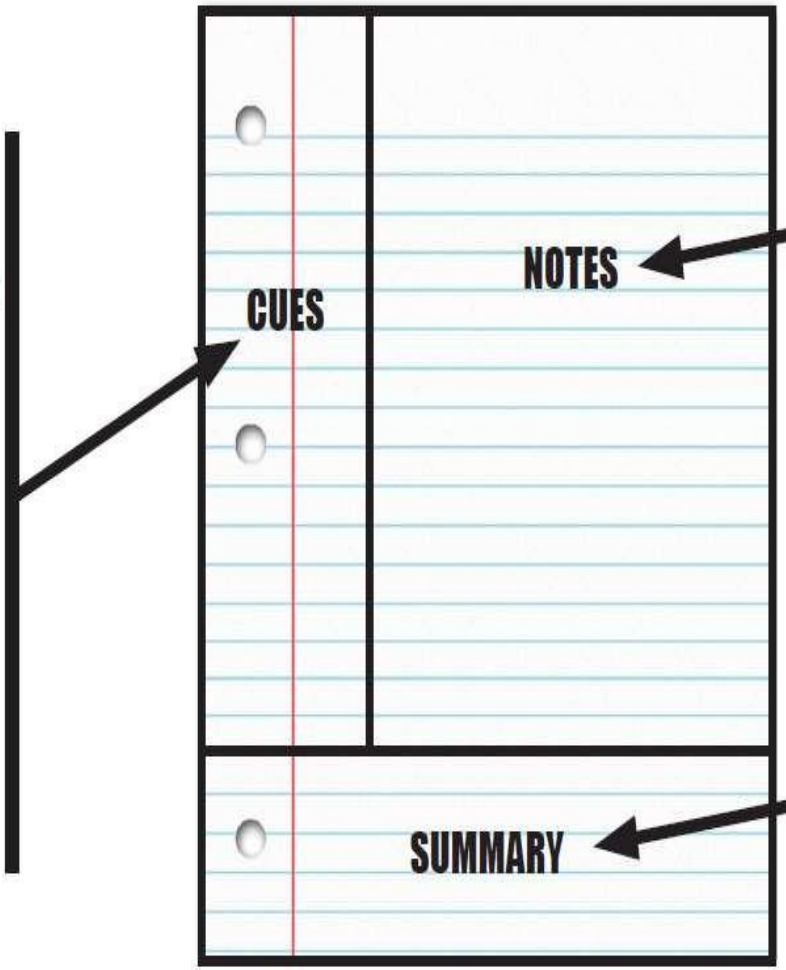

TIPS FOR EFFECTIVE NOTE-TAKING (after class)

- Review your notes within 24hours in order the decrease the chances of forgetting and improve the chances of retention

- Fill in the information you left out during classes and do any further reading you noted.

- Summarise your notes

TIPS FOR NOTE-TAKING (Cornell Method)

For:
- Main Ideas
- Questions that connect points
- Diagrams
- Prompts to help you study

When:
- Before class
- During class
- After class

For:
- Recording lecture

When:
- During class

For:
- Top-level main ideas
- Quick reference

When:
- After class
- Before next class (review)

Conclusion

- Effective note-taking is a key learning tool.
- Success within the academic discourse entails being an active participant of learning before, during and after lectures.
- And effective note-taking is a key sign of one's active participation.

COMMUNICATION STUDIES

WEEK 3

ETHICS IN SCHOLARLY WRITING

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

Lecture Outline

- Introduction
- Definitions of plagiarism
- Examples of plagiarism
- Causes of plagiarism
- Consequences of plagiarism
- How to avoid plagiarism

Ethics in Academic Writing

- In every field, there are a set of rules that shape the conduct and behaviour of its members.
- This is no different in the academic discourse community.
- One key ethical principle in scholarly writing bothers on plagiarism

Definitions of Plagiarism (1/2)

- Plagiarism has been defined severally:

1. Plagiarism is the act of copying or including in one's own work, without adequate acknowledgement, intentionally or unintentionally, the work of another, for one's own benefit

2. Plagiarism is using the ideas of another person and presenting them as if they were your own.

Definitions of Plagiarism (2/2)

3. It is the use of someone else's ideas or language as your own accidentally or deliberately.

4. Plagiarism is "literary theft" (Buranen and Roy 1999: 212)

Some instances of plagiarism (1/4)

There are several instances that can be classified as plagiarism:

- When one copies verbatim from books, articles, or online sources and so on without acknowledging source.

- When one copies verbatim from books, articles, or online sources and so on without presenting the material in quotation marks.

Some instances of plagiarism (2/4)

- When a student copies verbatim from other students' work (for instance, from students who took the same class in previous years).

- Copying verbatim from your own previous work (for instance, an essay that was written for a different class).

Some instances of plagiarism (3/4)

UBC COMMUNICATION STUDIES

- Presenting paraphrased or summarized ideas without stating the source.

- Improper paraphrasing; that is, maintaining the same sentence structure but replacing words of the original text with one's own words

- Not acknowledging the source when one uses organisational structure, topics or subtopics from other authors.

Some instances of plagiarism (4/4)

- When one does not use a documentation style (such as APA, MLA, Harvard) at all.

- When one does not use a documentation style properly.

- When majority of one's work is copied verbatim from other people's work (whether or not it is placed in quotation marks or cited)

EXCEPTION

UPSA COMMUNICATION STUDIES

1/2

- Generally, you are not required to provide the source for information which is classified as common knowledge.

- Common knowledge refers to information that is widely know by the people belonging to the field (such as academia, medicine etc) within which it is used.

- It is information that people would believe without having to look it up.

EXCEPTION

- Example of common knowledge:
  - The chemical formula for water is H_2O.
  - Dr. Kwame Nkrumah is the first president of Ghana.
  - The earth revolves around the sun.

If you doubt that an information is common knowledge, then it is probably not common knowledge, so cite it.

Some causes of plagiarism (1/2)

- Poor time management (inadequate time devoted to a writing task).
- Improper documentation during research/data collection.
- The desire to impress other scholars/academics.

- Lack/low level of knowledge of a referencing style.

Some causes of plagiarism (2/2)

- Laziness
- Fear of failing
- The belief that one cannot be caught
- Low academic writing skills
- Ignorance of the principles of academic writing.

Consequences of Plagiarism (1/2)

- It can destroy a student's reputation (grade reduction, assignment cancelation, course failure, suspension, expulsion, withdrawal of degree, demotion of academic staff etc.)

- It can destroy one's professional/ academic reputation.

Consequences of Plagiarism (2/2)

- It can destroy an institution's image.

- It may have legal or monetary repercussions for the individual (sometimes for the institution as well).

How to avoid plagiarism (1/5)

- Put all quoted passages in quotation marks.
- Provide the source for all quoted passages.
- Provide the source for all summarized and paraphrased ideas you borrow from other works

How to avoid plagiarism (2/5)

- Paraphrase and summarise properly by using your own sentence structure and words.

- Avoiding copying other students' work or your own work presented for another assignment.

- Avoiding over-relying on a single source for your work.

How to avoid plagiarism (3/5)

- Where applicable use your own headings, subtopics etc.

- Where it is necessary to use the organisational structure, headings and so on from other people's work, provide the source.

How to avoid plagiarism (4/5)

- Devout enough time to your writing, taking into consideration data collection time, drafting, revision and proof reading stages.

- Learn a documentation style relevant to your discipline.

How to avoid plagiarism (5/5)

- Keep a good record during research(for instance record relevant book and journal information, note page numbers and so on)

- Cultivate the habit of reading academic materials in order to acquire better academic writing skills.

- Use a software to check your essay for plagiarism.

LECTURE SUMMARY

- In short, failure to properly acknowledge the sources of information in one's work is plagiarism.

- Plagiarism has dire consequences for the individual and the academic institution they represent.

- As such, plagiarism should be avoided.

PARAGRAPH WRITING

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

END OF LECTURE

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

Paragraph

- WEEK 4

UPSA
UNIVERSITY OF PROFESSIONAL STUDIES, ACCRA
COMMUNICATION STUDIES

LECTURE OUTLINE

- Definition
- Parts of a paragraph
- Properties of a good paragraph:
- Paragraph Development

PARAGRAPH WRITING

- **A paragraph is a group of sentences that develops one main idea.**

- It discusses one idea in detail and aids the development of an overall topic for the essay.

- Paragraph lengths will vary depending on the purpose of the paragraph.

Parts of paragraph

- Topic sentence
- Supporting sentences
- Concluding sentences

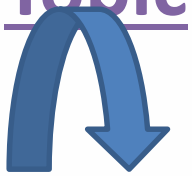

Topic sentence

- The main idea of each paragraph
- It is the most important part of your paragraph;
- It tells the reader the general idea of your paragraphs and should essentially “hook” them into wanting to read more!
- It helps to provide a “general summary” for your paragraph.

- A reader should encounter the topic sentence and have a general idea of what the paragraph will continue to discuss

Topic sentence

- Topic sentence
- **Topic**

- **UPSA is a fast growing university**

- **controlling idea**

Identify the topic and controlling idea in the following

- **The current energy crisis is the most serious to have been experienced in recent times.**

Supporting sentences.

- The other sentences in the paragraph explain the main idea.

- They add details and give support.

- The sentences are called **supporting sentences.**
- They elaborate upon the topic sentence

Types of supporting sentences.

There are two types of supporting sentences:

- **Major supporting sentences**
- **Minor supporting sentences**

❑ **Major supporting sentence provides new information or evidence which helps to make the Topic clearly understood by readers.**

❑ **Minor supporting sentences develops the major supporting sentence**

Concluding sentences.

- Sometimes paragraphs also have a **concluding sentence.**
- It is the last sentence of the paragraph.
- A final statement that ties together the ideas brought up in the paragraph and emphasizes the main idea one last time.

- The concluding sentence usually occurs at the end of a paragraph and summarizes the information presented in the paragraph.

UPSA
COMMUNICATION STUDIES

EXERCISE

Read the following model paragraph and study the parts.

The students in the class come from many different parts of the world. Some are from European countries such as France, Spain, and Italy. Others are from Middle Eastern countries like Saudi Arabia and Israel. Still other students were born in Asian countries, including Japan and Korea. The largest number of students are from Latin American countries like Mexico, Venezuela, and Peru. **The class is an interesting mix of people from many different countries.**

Read the following paragraph and identify the parts.

There are many reasons why people move. Some move to find better jobs or to advance their careers. Others are attracted to places with better weather. Still others want to move to a place with less crime. Finally, people often want to move to a place with a lower cost of living. For these reasons, every year millions of people pick up and move to new places.

The topic sentence is sentence .....

The supporting sentence(s) is/are sentence .....

The concluding sentence is sentence .....

Read the following paragraph and identify the parts.

- Many men are now employed in jobs that traditionally belonged to women. For example, there are now twice as many male nurses as there were ten years ago. The number of male flight attendants has increased from zero in 1960 to over 10,000 today. Similarly, there are many more male secretaries, elementary school teachers, and telephone operators than ever before. It is clear

that ideas about traditionally female occupations have changed.

Properties of Paragraph:

- Unity
- Coherence.
- Relevance/ Completeness

Unity

- A paragraph is **unified** when all its sentences are concerned with a central controlling idea.

- A paragraph demonstrates unity when all of its sentences belong to the same main idea.

- In order for a paragraph to maintain a sense of unity, the paragraph must focus solely on a single idea, point, or argument that is being discussed.

Unity II

- Therefore, the paragraph should not begin to stray and develop new ideas.

- If you begin to write sentence that wander from the paragraph's main idea, then it is time to start a new paragraph

Completeness

- A paragraph provides information on one well explained or argued point.
- Each paragraph must provide adequate and convincing evidence that supports the point made.
- The evidence can be facts, explanations, examples or other pieces of information that make the topic sentence and its controlling idea understandable

- It must be ‘complete’ such that little or no doubt can be raised against the point that has been made by the topic sentence.

Coherency.

- What order you put things in is called **paragraph coherency.**

- Sentences have to be in an order that makes sense to readers.

- This order may be chronological if you are narrating an event in time .

Is the paragraph unified?

- **One battle of adolescence I had was dealing with the demoralizing physical problem of acne. Some days, I would wake up in the morning with a red bump the size of a taillight on my nose. Since I worried constantly about my appearance anyway, acne outbreaks could turn me into a crying, screaming maniac. Plastering on a layer of (at the time) orange-colored Clearasil, which didn't fool anybody, I would slink into school, hoping that the boy I had a crush on would be absent that day. Within the last few years, this embarrassment has been mostly eliminated for teens by new forms of treatment. Now, skin**

doctors prescribe special drugs that clear up pimples almost immediately. But back then, an acne attack could shatter whatever small amount of self-esteem I had managed to build up.

Questions to ask of your paragraphs for better paragraph unity:

- What is the paragraph's central, controlling idea?

- Does each sentence in the paragraph relate directly to developing or explaining that idea?

- Are there any sentences that do not relate to the central idea and therefore need to be eliminated?

STRATEGIES TO IMPROVE COHERENCE

- **1. Follow a paragraph plan**

- Outline each paragraph. Start with a strong topic sentence that offers the controlling idea of the paragraph.

- Then outline key sub-points and major supporting ideas.
- Finally, list specific examples and support. You can more easily manipulate ideas in an outline than in a drafted paragraph.

STRATEGIES TO IMPROVE COHERENCE

- **2. Use old-to-new structure**
- Between sentences: One way to create cohesion is by referring in each sentence to information in the previous sentence.

STRATEGIES TO IMPROVE COHERENCE

- **2. Use old-to-new structure**

Read the following paragraph and note how what is new (in bold) repeats what was just stated (underlined):

- In 1885, journalist Owen Wister moved west to Wyoming. **There** he found the material he needed to write his most famous novel, *The Virginian*. **This book** is the first of a new genre: the horse-opera novel.

STRATEGIES TO IMPROVE COHERENCE

- **3. Place important words at the end of a sentence to emphasize them**
- Just as you place unfamiliar ideas at the end of a sentence, the best place for words you want to highlight and make most prominent is usually at the end of the sentence.

STRATEGIES TO IMPROVE COHERENCE

- **3. Place important words at the end of a sentence to emphasize them**

Examine this example

- This steel is principally used for making razors because of its **hardness.**

- As a result of its **hardness**, this steel is principally used for making razors.

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

- Sometimes readers need a stronger signal between paragraphs or sentences in order to understand the logical relationship between ideas.

- Transitions work **between** and **in** paragraphs like driving signs work on the roads: they signal what is ahead and keep readers from getting lost.

- We often call them "cueing" phrases because this is just what they do: cue readers.

STRATEGIES TO IMPROVE COHERENCE

- **4. Use Transitions**
- **<u>Transitional Devices (Connecting Words)</u>**
- Transitional devices help you carry over a thought from one sentence to another, from one idea to another, or from one paragraph to another with words or phrases.

- Transitional devices link your sentences and paragraphs together smoothly so that there are no abrupt jumps or breaks between ideas.

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Add:**
- and, again, and then, besides, equally important, finally, further, furthermore, nor, too, next, lastly, what's more, moreover, in addition, first (second, etc.),

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Compare:**
- whereas, but, yet, on the other hand, however, nevertheless, on the other hand, on the contrary, by comparison, where, compared to, up against, balanced against, vis-à-vis, but, although,

conversely, meanwhile, after all, in contrast, although this may be true

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Prove:**
- because, for, since, for the same reason, obviously, evidently, furthermore, moreover, besides, indeed, in fact, in addition, in any case, that is

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Show Exception**:

  yet, still, however, nevertheless, in spite of, despite, of course, once in a while, sometimes

- **To Show Time:**

immediately, thereafter, soon, after a few hours, finally, then, later, previously, formerly, first (second, etc.), next, and then

UPSA COMMUNICATION STUDIES

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions:

Transitional Devices

- **To Emphasize:**

definitely, extremely, obviously, in fact, indeed, in any case, absolutely, positively, naturally, surprisingly, always, forever, perennially, eternally, never, emphatically, unquestionably, without a doubt, certainly, undeniably, without reservation

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

UPSA
COMMUNICATION STUDIES

Transitional Devices

- **To Show Sequence:**

- First, second, third, and so forth. next, then, following this, at this time, now, at this point, after, afterward, subsequently, finally, consequently, previously, before this, simultaneously, concurrently, thus, therefore, hence, next, and then, soon

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Give an Example:**
- For example, for instance, in this case, in another case, on this occasion, in this situation, take the case of, to demonstrate, to illustrate, as an illustration, to illustrate

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **To Summarize or Conclude:**
- In brief, on the whole, summing up, to conclude, in conclusion, as I have shown, as I have said, hence, therefore, accordingly, thus, as a result, consequently, on the whole

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **TAKE NOTE OF THE FOLLOWING:**
- Choose appropriate transitions, but use them sparingly.
- However, they will seem more obvious to you than they will to readers. For variety, try shifting the placement and choice of transitions.

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **TAKE NOTE OF THE FOLLOWING:**
- Placement of transitions inside paragraphs: If your paragraph has subsections, add transitions in subtopic sentences to signal the readers.

- Transitions will move readers smoothly from one idea to the next.

STRATEGIES TO IMPROVE COHERENCE

4. Use Transitions

Transitional Devices

- **TAKE NOTE OF THE FOLLOWING:**
- <u>Placement of transitions between paragraphs</u>: Since paragraphs each develop different ideas, readers often benefit from a clear transition.

- Be careful about the placement of the transition, however.
- For paragraphs to be unified, do not introduce the next paragraph's main idea in the paragraph before it. Rather

STRATEGIES TO IMPROVE COHERENCE

Rather, introduce the paragraph at the start of the paragraph, perhaps starting out with a reference back to what was just stated.

- **Questions to ask for better coherence:**
- What am I trying to accomplish in the paragraph? Is there an order of ideas that would strike readers as clear and obvious? Does each sentence relate to the sentences that come before and after it? Can I use cueing words or phrases like "Secondly" or Another example is" to give readers a better signal about the relations between sentences or groups of sentences?

UPSA

PARAGRAPHS: DEVELOPMENT

A paragraph is **well-developed**

a) when it contains specific details that help explain and illustrate the controlling idea.

b) when readers have all the information they need to make sense of the paragraph.

Methods of developing paragraph

- There are various methods of providing support for you topic sentence and general statement

- The type you choose depends on the purpose and audience.
- **1)Use examples:**

2) <u>Do not rely on one example</u>:

3) Use facts:

4) Offer expert opinion:

Summary: Characteristics of a

- A paragraph is **good paragraphunified** when all of its sentences are concerned with a central, controlling idea.

- It is **coherent** when its sentences are arranged in a clear order according to some definite plan.

- It is **well-developed** when it contains specific details that help explain and illustrate the controlling idea and when readers have all the information they need to make sense of the paragraph.

Summary: Characteristics of a

- But remember that before we can judge as **good paragraph** paragraph based on the above three characteristics, the paragraph first need two things:

- It must have a good topic sentence

- It must be relevant to the entire essay

CREDIT HOURS: 3

THE ACADEMIC ESSAY

Outline of lesson

- What the essay is?
- Steps to write an essay
- The rhetorical modes of the essay and functions

What is an essay ?

The word ‘essay ’ is derived from the Latin word ‘exagium ’, meaning “the presentation of a case .”

“An essay is an extended piece of writing that presents and supports a thesis or a proposition ”.

It could also be described as “A general piece of writing that gives the author's own argument .”

When you write an essay you are making a case for the validity of a particular point of view, analysis, interpretation, or a set of facts or procedures .

Steps to write an essay

Rhetorical modes of the essay

The essay is categorized into four rhetorical modes, namely:

descriptive,

narrative,

expository,

argumentative,

The DESCRIPTIVE ESSAY

The Descriptive Essay is a type of essay characterized with sensory details which appeal to a reader's emotional, physical or intellectual sensibilities.

A descriptive essay is usually arranged spatially but can also be chronological.

Descriptive writing can be found in the other rhetorical modes such as the journal writing and poetry.

Important things to note about descriptive essays

- ✓ The use of clear and concise language.
- ✓ Use language to appeal to our sense of touch, taste, smell, sight, and hearing
- ✓ Choose vivid language with the use of tools such as denotative language, connotative language, figurative language, metaphors and simile to arrive at a dominant impression.
- ✓ Leave the reader with a clear impression and always be organized.

The NARRATIVE ESSAY

The purpose of narrative essays is to tell a story or narrate an event or series of events.

This writing mode frequently uses narration and description as useful tools for putting details of information into some kind of logical order, usually chronological.

Working with narration helps us see clear sequences. Example of this type of essays include anecdotes, autobiography, biography, novels, oral history and short stories.

NB: The focus of narrative writing is the sequence of events (plot line).

Important things to note in narrative essays

- ✓The essay should have a purpose.
- ✓ It should be written from a clear point of view (first, third point of view etc.)
- ✓Should use clear and concise language throughout
- ✓The use of flashbacks and flash-forwards and transitions

EXPOSITORY ESSAYS

The expository essay is a genre of essay that requires the writer to investigate an idea, evaluate evidence, expound on the idea, and set forth an argument concerning that idea in a clear and concise manner.

The purpose of expository writing is to explain and analyze information by presenting an idea, relevant evidence, and appropriate discussion.

In narrative contexts exposition provides background information to teach or entertain.

In other nonfiction contexts (such as technical communication), the purpose is to teach and inform.

Examples include reports, press releases, news articles, business letters, how-to essays such as recipes and other instructions.

Important things to note about expository essays

A clear, concise, and defined thesis statement that occurs in the first paragraph of the essay.

Clear and logical transitions between the introduction, body, and conclusion.

Body paragraphs that include evidential support (whether factual, logical, statistical or anecdotal)

Uses a bit of creativity

A conclusion that does not simply restate the thesis, but readdresses it in light of the evidence provided

ARGUMENTATIVE ESSAYS

It is a critical piece of writing aimed at presenting objective analysis of the subject matter.

Its purpose is to both educate and persuade the reader on a particular point of view.

In this regard it is similar to a persuasive essay, but generally presents its view in a stronger, perhaps more controversial way.

It may target an audience that is more resistant to its viewpoint or message.

Argumentative Style

Argumentative essays follow a general format.

1. **The writer states an initial thesis that contains the point of view for which the author is arguing.**
2. **The body generally presents both sides of the argument, although each con is refuted in turn.**
   - **The author may first present the pros of the argument, then offer the cons and refutation later in one paragraph. Or, each con may be both presented and refuted in an individual paragraph.**
3. **The author presents the desired conclusion in the final paragraph.**

The structure of the

- All of these types of essays are written in the following structure:
  - The introductory paragraph
  - The body paragraphs
  - The concluding paragraph

Assignment

The following are the characteristics of the four main types of essays we know:

argumentative, expository, narrative and descriptive. Choose the appropriate

characteristic for the respective type of essay and give a reason why you selected that. a. Creating a mood

b. Setting the point of view
c. Cause and effect
d. Counter claim

WHAT IS AN INTRODUCTORY PARAGRAPH?

WHAT IS AN INTRODUCTORY PARAGRAPH?

- The paragraph that begins an essay or is the first paragraph of an essay.
- It introduces the main idea of an essay.
- An introductory paragraph opens an essay, composition, or report and informs the reader about the topic.
- It guides readers to important ideas in the body of the essay.

When writing an introductory paragraph one must:

- Introduce the topic (opening)
- Decide which METHOD OF INTRODUCTION to use.
- Explore the topic.
- Determine your audience
- Determine the language
- Be short and direct
- Reveal the central idea of the topic which is the THESIS STATEMENT.

Continuation : Introductory Paragraph

In writing an introductory paragraph, one should not:

- ❖Make self-critical statements. For instance; I do not have much background in this subject or I am not sure if I am right but here is my opinion.
- ❖Do not use over worn expressions. Avoid empty statements. For instance, love is what makes the world go round or hate makes waste.
- ❖Avoid unnecessary dictionary definitions.

Writing the opening sentence

- The element of the introduction is the opening sentence.
- The opening sentence is a sentence that announces the topic of the essay.

– Topic: Causes of road accidents in Ghana – The effects of vigilantism on national security

- An example of the opening sentence:
  - (1) Road accidents have claimed many lives in Ghana.
  - (2) Road accidents have been caused by a number of factors in Ghana.
  - (3) Road accidents have become a national issue these days.

Method of Introduction

- Narrative/Short stories/Anecdotes

- Questions
- Quotation
- Historical information/background
- Definitions
- Statistics
- General to specific method

NARRATIVES/ SHORT STORIES/ANECDOTES

❖This method is to tell a brief story or personal experience.

- ❖The narration should illustrate the point you want to make in your essay.
- ❖Using a narrative to begin an essay is one of the most effective ways to spark interest in the reader.
- ❖The story should be short enough to tell in few sentences.

A sample of an intro…

- The rate at which teenage pregnancy is on the increase these days in Ghana has become the greatest worry to most parents. Just recently, a teenage girl of about 14 years whose mother leaves the house as early as 4:00 am and returns as late as 11:pm has been left her fate. Left alone at home the teenager began to associate herself with bad boys in the

area. This continued for a few months and they engaged in unprotected sex. One day, this teenage girl was burning with fever so her mother rushed her to the hospital. At the hospital the doctor recommended a pregnancy test and it came up that the girl was three months pregnant. This is just one of the teenage pregnancy cases in Madina.

QUESTIONS

- Asking a question at the beginning of an essay is a useful tool for drawing the reader in.

- ❖The questions can be used to intrigue the reader or it can set the tone of the essay.
- ❖You should ask questions that relate directly to the topic itself.
  - The rate at which teenage pregnancy is on the increase these days in Ghana has become the greatest worry to most parents. The question one may ask is “What at all do these teenagers gain in pre-marital sex?

QUOTATION

- Quotations are used when someone has clearly stated an opinion you agree with.
- That gives the reader a clear idea of your point.
- The quotation needs to be relevant to the topic and familiar to the reader.
- A well chosen quotation adds credibility to the essay.

SAMPLES OF QUOTATIONS

- GIRL CHILD EDUCATION HAS PLAYED A SIGNIFICANT ROLE IN THE MOTIVATION OF WOMEN IN GHANA. A FAMOUS EDUCATIONIST OF GHANA, DR. KWEGYIR AGGREY ONCE SAID: “IF YOU EDUCATE A MAN YOU EDUCATE AN INDIVIDUAL BUT IF YOU EDUCATE A WOMAN YOU EDUCATE A WHOLE NATION.”

Historical information/background

- In papers where historical context is needed, background information can help clarify things to the reader.

❖ Historical facts or information must offer the reader any essential information he or she might need in order to understand the topic of the paper.

❖The meaning of vigilantism to Ghanaians

GHANA AT 64; THE WAY FORWARD

- The British colonizers in the Gold Coast tried to control everything from trade and transportation to religion and social structures but the local people resisted in many different ways to reclaim their ability to make their own decisions and shape their own lives and societies. This

initiative was led by Ghana's first president, Osagyefo Dr. Kwame Nkrumah, who said on the eve of independence in 1957 "Ghana's independence is meaningless unless it is linked to the total liberation of the African continent." " …Ghana our beloved country is free forever…"

DEFINITIONS

- When an unknown term is going to be used throughout the essay, defining that term can serve as an introduction to the essay.

- Certain words or phrases in the title are not widely understood therefore defining them makes the content of the paper clear to the reader.

- THE HISTORY BEHIND THE FORMATION OF VIGILANTE GROUPS

STATISTICS

- It provides an empirical evidence to support the thesis.
- It helps demonstrate extensive research to back your points in the body.

❖It must be clearly stated to clear doubts on the minds of the reader.

❖It should link with the topic.

Sample of Statistic method

- The rate at which teenage pregnancy is on the increase these days in Ghana has become the greatest worry to most parents. The phenomenon has been the case over the past five years in some regions of the country where Central regions records 29% of the teenage pregnancy cases in the country. This is followed by Bono East Region recording 28% of the and Greater Accra

Region with 24%. Ashanti Region records 19% as the least of the teenage pregnancy cases in the country.

GENERAL TO SPECIFIC

- The writer uses this method in his introduction by moving from a broad observation about a topic to specific details in support of the thesis .
- The topic sentence should identify a general statement about the subject.
- The writer should make sure the reader can understand and relate to the specific example.

Sample

- There are number of accidents that occur among humans. Some of these accidents include industrial accidents, domestic accidents and road accidents. Road accidents have become a national issue in Ghana. They can be caused by reckless driving, poor roads and bad weather.

WHAT IS A THESIS STATEMENT?

❖ It is the direct categorical statement that reveals the main idea to be addressed in an essay.

- It is the sentence that states the central idea of an essay and helps control the ideas within the paper.
- A strong thesis statement gives direction to the paper. It informs the reader on what to discuss in the body of the paper.
- A good practice is to put the thesis statement at the end of the introduction to lead the reader into the body of the paper.

Continuation

- To develop a thesis statement one must:

- ❖Write the topic and main ideas of the paper in the form of points.
- ❖Freely write the most important thoughts you have about the paper.
- ❖Try to make connections between the points and highlight implications, causes or applications to answer the question.
- ❖Combine the above ideas into one sentence.

Trial topic

- Two types of thesis statement
  - Direct: The major cause of road accidents to be discussed in this essay include careless driving, bad roads and bad weather.
  - Indirect: This essay talks about the major causes of road accidents in Ghana.
- It explains and discusses or proves the thesis statement stated in the introductory paragraph because each developmental paragraph discusses an aspect of the central idea expressed in the thesis statement.

Stephen Bailey

Outline

Outline

- What is a paragraph?
- Components/Parts of a paragraph
- Principles of Paragraphing
- Paragraph Cohesion/Devices
- Concluding Paragraph
- Methods of Conclusion

Writing An Academic Essay

- There are basically three main types of paragraphs:
  I. Introductory paragraph
  II. Body paragraph/ developmental paragraph
  III. Concluding paragraph

- This lesson discusses **the body paragraph**

What is a Paragraph?

Definition:

- A paragraph is a group of related sentences that develop one idea or point.
- A paragraph is a unit of information.

Paragraphing Cont'd

What should be the length of a paragraph?

- The length of a paragraph is determined by the idea discussed in that paragraph.
- A simple idea may require a relatively fewer number of sentences to develop it.
- Whereas a complex idea may require relatively more sentences to fully develop it

Body Paragraph

Components / parts of a (body) paragraph:

- A paragraph is composed of three main parts:
    I. Introductory part: topic sentence
    II. Body: support sentences
    III. Conclusion: concluding statement

Cont'd

The topic sentence:

- It expresses the controlling idea or the main idea of the paragraph.
- It must be one sentence.
- It must be precise and concise.
- In an academic essay, students should begin each body paragraph with a topic sentence.

Cont'd

Support sentences (developmental sentences):

- They elaborate/ explain/ provide further details of the controlling idea.
- i.e. they develop the idea contained in the topic sentence •

  They could be in the form of:

  - analysis
  - explanation
  - examples
  - Reasons
  - facts

- statistics
- evidence, etc.

Cont'd.

- **Sub-classification of support sentences:**
  a. Major support sentence: it directly develops the topic sentence
  b. Minor support sentence: it directly develops a major support sentence

Cont'd.

Concluding Statement/ Topic Closure:

- It ends/ concludes the paragraph; it gives the paragraph a sense of closure.
  - Restate your main idea in other words
  - Provide a transition to next paragraph
  - Summarize
  - Make an observation

Principles of Paragraphing

Three important principles of paragraphing:

- Unity
- Completeness
- Coherence

Paragraph Unity

- The word ‘unity’ refers to ‘oneness’
- Paragraph unity requires that each paragraph discusses one main idea and that all the support sentences develop that main idea.
- To ensure unity, students must check each support sentence to see if it truly develops the topic sentence.

Paragraph Completeness

Paragraph completeness requires that the paragraph contains enough relevant details.

- To ensure completeness, students must provide all relevant details of the main idea.
- Details may be in the form of analysis, facts, reasons, statistics, examples, explanation, etc.

- The paragraph must be ‘complete’ such that little or no doubt can be raised against the point that has been made by the topic sentence

Paragraph Coherence/Cohesion

- Paragraph cohesion requires that all sentences in the paragraph are logically linked with explicit cohesion devices.

- It requires that the relationship between each sentence and the one before or after it is very clear.

Cohesion Devices

Coherence allows the reader to follow a writer's train of thought without the reader straining to understand what the writer is saying.

Cohesion devices may include:

- transitional expressions
- Pronouns
- Repetition of keywords

– Parallel structures, etc.

Cohesion devices: examples of transitions

- **Addition:** in addition, and, furthermore, moreover, besides, too,
- **Time:** afterwards, later, soon, then, now
- **Illustration:** for instance, for example, such as

- **Contrasting/ change-of-direction:** but, however, yet, although, still, otherwise
- **Reason:** so, because, therefore, as a result
- **Conclusion:** finally, in summary, as a result

Concluding Paragraph

- The concluding paragraph is the last paragraph of an essay.

- It reminds the reader of your central idea.
- There should be a sense of closure.
- Never begin a new idea in the concluding paragraph.

Cont'd.

In writing a concluding paragraph, you need to:

- Summarize your argument and the main themes.
- State your general conclusions.

- Make it clear why those conclusions are important or significant.
- In your last sentence, sum up your argument very briefly, linking it to the title.

Methods of Conclusion

Sum up the main points of the discussion and

  – Provide a final thought

- Recall your thesis/ central idea (not in the same words as in the introduction)
- Offer an advice/ a suggestion/ a recommendation; call for action
- Make a prediction
- Ask a provocative question
- Use an appropriate quotation

WEEK 9

- Summary Writing and Paraphrasing

Third Edition
Academic Writing
A Handbook for International Students
Stephen Bailey

Outline

Outline

- What a summary is
- Techniques for effective summarizing
- Sentence Level Summary
- Paragraph Level Summary
- What a paraphrase is
- Techniques for effective paraphrasing

Summary: what it is

- A summary condenses the main points of an original text.
- Summary exercises usually require students to identify main ideas presented in a passage and present them concisely in their own words.

- The ability to write a good summary demonstrates one's understanding of a text.

Features/characteristics of summary

- A summary is a condensed or shortened version of a piece of writing.
- The length of a summary is shorter than that of a paraphrase.

- A good summary presents the essence of a writer's ideas without including background information and supporting details.

In some cases, summarized texts can include quotations from an original text.

- In such instances, the quoted sections should be enclosed in quotation marks.
- It contains only the relevant events, materials, facts or observations of the original text.

- The irrelevant materials, events, etc are ignored.

-
- A summary restates the message of the original text – exactly as the original text.

  It usually maintains technical words.
- It is in a writer's own words.
- A summary uses appropriate reporting verbs such as suggests, contends, claims, observes etc.
- It is devoid of examples, explanations, unnecessary adjectives and adverbs.

Techniques for effective summary writing

- Understand the information that needs to be to summarised.

- Also, follow the trend of information flow.

-
- Then, identify and select information that is considered relevant.

  In making a summary, reduce some phrases and clauses into single words.

- In addition, eliminate some subordinate clauses and maintain main clauses.

- When summarizing a paragraph, identify the topic sentences and those will help you make the summary.

Sentence Level Summary

- The most important parts of a sentence are the subject and the finite verb.

-
- So, in summarizing a sentence, these two parts /elements must be present.

  If the finite verb requires an object, then, it must be supplied.

- Qualifying words and phrases may be omitted, unless they form an essential part of the meaning of the sentence.

Example 1:

- The Board of Governors **suspended proceedings and dispersed** until the following Friday.
- Summary: The Board of Governors **adjourned** until the following Friday.

  The sentence in Example 1 has twelve words but the summary has reduced that to nine because the four words in bold have been replaced with just one word (adjourned) in the summary.

•

Example 2:

- The policy was **one that can not be put into practice.**

- Summary: The policy was **impracticable.**

- The sentence in Example 2 has eleven words but the summary has reduced that to four words because the eight words in bold have been replaced by one word in the summary.

Paragraph Level Summary

- For a one-paragraph summary, discuss each supporting point in a separate sentence.

- Give one to two explanations for each supporting point, summarizing the information from the original.
- For a multi-paragraph summary, discuss each supporting point in a separate paragraph.

- Introduce it in the first sentence (topic sentence).

Example of Paragraph Level Summary

Original text

- Iraq was once, like the United States, a country of firsts. The nation emerged in Mesopotamia around 5000 BC. Its inhabitants learnt to plant, irrigate and harvest crops. They were also one of the earliest society to learn how to write and label their agricultural products. They also made transportation inventions when they learnt to hitch potter's wheels onto horses. It was also the place where time was first carved into sixty minutes and circles into three hundred and sixty degrees.

The Carpet Wars (Kremmer, 2002).

Summary

- Iraq was once a centre of innovation where new methods of agriculture, transportation, writing and measurement were generated (Kremmer, 2002).

Adapted from Glenn et al (2004)

Paraphrasing: what it is

- Closely related to the quotation is the paraphrase.
- This involves picking the ideas of an author and writing them in your own words.
- In other words, it is a rewriting of an original text in one's own words in order to bring about clarity.

- A paraphrased text may either be shorter, equal or longer than the original text.

Techniques for effective paraphrasing

In paraphrasing,

- the sentence structure and the vocabulary of the original text are changed.
- technical terms are maintained.
- The first sentence introduces the paraphrased material.

- The reporting verbs must be well chosen.
- Example: Owusu (2018) considers, declares, maintains etc.
- In-text citation is preferred.
- The year and page numbers are not required for second and subsequent references to the writer within a paragraph, if the references are to the same work and the same page.
- The source should have a reference list entry after the paraphrase giving full bibliographic details.

Example of a Paraphrased Text

Original Text

- To the extent that a woman's self-image is challenged or threatened by an unattainable ideal of an impossibly thin female physique, she may well become susceptible to disruption of her self-regard, and may be more likely to develop an eating disorder.

Paraphrase

- If a woman interprets the media's representation of thinness as the ideal she must achieve, her sense of self-esteem might be threatened and even damaged, making her more likely to exhibit disordered eating patterns (Polivy & Herman, 2004, p. 2).

GENERAL GUIDELINES FOR SUMMARIZING AND PARAPHRASING TEXTS

- Read the original passage carefully to understand the main points completely.

- Identify the main ideas/sections for easy reference.

- One way of doing this is by underlining the topic sentences and key facts raised in the text.
- Points which are too difficult to understand can also be identified and clarified.

- Rewrite the passage by focusing on the main ideas/sections presented in the original texts, re-phrasing the topic sentences and replacing certain key words with synonyms.

- The summary should be concise and include key ideas and not minor details.

- Summaries and paraphrases should be written without the inclusion of personal opinions, ideas or interpretations.

- Rather, ensure that the summarized text accurately reflects what the original author intended to say.

- Make sure the order of the original passage is retained in the summarized or paraphrased version.

- This is because a distortion in the order may cause a change in meaning.

- After writing, check the accuracy of the summary by making sure it correctly represents an author's key points or ideas and is devoid of personal opinion or commentary.

- Any direct quotations should be correctly cited.

- The last stage of the summary and paraphrase writing process is to proofread and edit the text.

- This is to enable writers to correct any errors arising from punctuation and spelling.

WEEK 9

- Summary Writing and Paraphrasing

Third Edition
Academic Writing
A Handbook for International Students
Stephen Bailey

Outline

Outline

- What a summary is
- Techniques for effective summarizing
- Sentence Level Summary
- Paragraph Level Summary
- What a paraphrase is
- Techniques for effective paraphrasing

Summary: what it is

- A summary condenses the main points of an original text.

- Summary exercises usually require students to identify main ideas presented in a passage and present them concisely in their own words.

- The ability to write a good summary demonstrates one's understanding of a text.

Features/characteristics of summary

- A summary is a condensed or shortened version of a piece of writing.
- The length of a summary is shorter than that of a paraphrase.

- A good summary presents the essence of a writer's ideas without including background information and supporting details.

- In some cases, summarized texts can include quotations from an original text.

- In such instances, the quoted sections should be enclosed in quotation marks.
- It contains only the relevant events, materials, facts or observations of the original text.

- The irrelevant materials, events, etc are ignored.

- A summary restates the message of the original text – exactly as the original text.

  It usually maintains technical words.
- It is in a writer's own words.
- A summary uses appropriate reporting verbs such as suggests, contends, claims, observes etc.
- It is devoid of examples, explanations, unnecessary adjectives and adverbs.

Techniques for effective summary writing

- Understand the information that needs to be to summarised.

- Also, follow the trend of information flow.

- Then, identify and select information that is considered relevant.

  In making a summary, reduce some phrases and clauses into single words.

- In addition, eliminate some subordinate clauses and maintain main clauses.

-
- When summarizing a paragraph, identify the topic sentences and those will help you make the summary.

Sentence Level Summary

- The most important parts of a sentence are the subject and the finite verb.

- So, in summarizing a sentence, these two parts /elements must be present.

  If the finite verb requires an object, then, it must be supplied.

- Qualifying words and phrases may be omitted, unless they form an essential part of the meaning of the sentence.

Example 1:

-
- The Board of Governors **suspended proceedings and dispersed** until the following Friday.
- Summary: The Board of Governors **adjourned** until the following Friday.

  The sentence in Example 1 has twelve words but the summary has reduced that to nine because the four words in bold have been

replaced with just one word (adjourned) in the summary.

Example 2:

- The policy was **one that can not be put into practice.**

- Summary: The policy was **impracticable.**

- The sentence in Example 2 has eleven words but the summary has reduced that to four words because the eight words in bold have been replaced by one word in the summary.

Paragraph Level Summary

- For a one-paragraph summary, discuss each supporting point in a separate sentence.

- Give one to two explanations for each supporting point, summarizing the information from the original.
- For a multi-paragraph summary, discuss each supporting point in a separate paragraph.

- Introduce it in the first sentence (topic sentence).

Example of Paragraph Level Summary

Original text

- Iraq was once, like the United States, a country of firsts. The nation emerged in Mesopotamia around 5000 BC. Its inhabitants learnt to plant, irrigate and harvest crops. They were also one of the earliest society to learn how to write and label their agricultural products. They also made transportation inventions when they learnt to hitch potter's wheels onto horses. It was also the place where time was first carved into sixty minutes and circles into three hundred and sixty degrees.

The Carpet Wars (Kremmer, 2002).

Summary

- Iraq was once a centre of innovation where new methods of agriculture, transportation, writing and measurement were generated (Kremmer, 2002).

Adapted from Glenn et al (2004)

Paraphrasing: what it is

- Closely related to the quotation is the paraphrase.
- This involves picking the ideas of an author and writing them in your own words.
- In other words, it is a rewriting of an original text in one's own words in order to bring about clarity.

- A paraphrased text may either be shorter, equal or longer than the original text.

Techniques for effective paraphrasing

In paraphrasing,

- the sentence structure and the vocabulary of the original text are changed.
- technical terms are maintained.
- The first sentence introduces the paraphrased material.

- The reporting verbs must be well chosen.
- Example: Owusu (2018) considers, declares, maintains etc.
- In-text citation is preferred.
- The year and page numbers are not required for second and subsequent references to the writer within a paragraph, if the references are to the same work and the same page.
- The source should have a reference list entry after the paraphrase giving full bibliographic details.

Example of a Paraphrased Text

Original Text

- To the extent that a woman's self-image is challenged or threatened by an unattainable ideal of an impossibly thin female physique, she may well become susceptible to disruption of her self-regard, and may be more likely to develop an eating disorder.

Paraphrase

- If a woman interprets the media's representation of thinness as the ideal she must achieve, her sense of self-esteem might be threatened and even damaged, making her more likely to exhibit disordered eating patterns (Polivy & Herman, 2004, p. 2).

GENERAL GUIDELINES FOR SUMMARIZING AND PARAPHRASING TEXTS

- Read the original passage carefully to understand the main points completely.

- Identify the main ideas/sections for easy reference.

- One way of doing this is by underlining the topic sentences and key facts raised in the text.
- Points which are too difficult to understand can also be identified and clarified.

- Rewrite the passage by focusing on the main ideas/sections presented in the original texts, re-phrasing the topic sentences and replacing certain key words with synonyms.

- The summary should be concise and include key ideas and not minor details.

- Summaries and paraphrases should be written without the inclusion of personal opinions, ideas or interpretations.

- Rather, ensure that the summarized text accurately reflects what the original author intended to say.

- Make sure the order of the original passage is retained in the summarized or paraphrased version.

- This is because a distortion in the order may cause a change in meaning.

- After writing, check the accuracy of the summary by making sure it correctly represents an author's key points or ideas and is devoid of personal opinion or commentary.

- Any direct quotations should be correctly cited.

- The last stage of the summary and paraphrase writing process is to proofread and edit the text.

- This is to enable writers to correct any errors arising from punctuation and spelling.

WEEK 10

Reporting Verbs:

Writing From Multiple Sources (In-text Citation- APA)

Outline

- Introduction
- Functions of reporting verbs
- Classifications of reporting verbs
- In-text citation
- Types of in-text citation
- Referencing Styles
- APA in-text citation

Introduction

- In academic writing, there is the need to make reference to what other authors have already said about the topic a person is writing about.

- It is therefore important for a writer to explicitly link the original author to the information that is being used in one's own academic essay.

Introduction

- One sure way to incorporate the ideas or words of other people into a person's scholarly work is to use reporting verbs.

- Reporting verbs are always accompanied by a reference to show where a writer gathered the information being used to develop his/her own argument.

Functions of Reporting Verbs

- They are used to report on what other authors have done: whether they have made claims; argued a case; established findings; drawn conclusions etc.

- They signal your attitude (whether you agree, disagree etc.) toward the status of the author's theories or research; or your evaluation of the evidential status of the sources you are reviewing.

- The verbs are effective way for writers to refute prior research and establish a niche for their own alternative position.

Classifications of Reporting Verbs

- There are so many reporting verbs to choose from and, depending on the context, they might be used to convey more than one position (e.g., agreement, disagreement, neutrality etc.).

- So, it is possible to use a particular reporting verb in more than one category.

- In the succeeding slides, a list of reporting verbs have been classified according to the critical positions they signal:

Classifications of Reporting Verbs

- **Agreement:** use the following reporting verbs to show that you agree with an author's perspective, interpretation or conclusion:

shows	agrees
confirms	explains
identifies	finds
evidences	proves
attests	points out
illustrates	supports

Classifications of Reporting Verbs

- **Disagreement:** use the following reporting verbs to show that you disagree with an author's perspective, interpretation or conclusion:

believes	claims
justifies	surmises
insists	conjectures
assumes	supposes
alleges	disregards
denies	speculates

Classifications of Reporting Verbs

- **Neutral:** use the following reporting verbs to give an unbiased account of what a text says:

observes	conveys	says
describes	relates	quotes that
discusses	writes	remarks
reports	articulates	mentions
states		
outlines		

Classifications of Reporting Verbs

- **Acceptance:** use the following reporting verbs to show that you accept an author's argument as an uncontested fact after you have critically assessed it:

recognises	uncovers	supports
clarifies	admits	concludes
acknowledges	demonstrates	elucidates
concedes	highlights	reveals
accepts	illuminates	refutes
verifies		

Classifications of Reporting Verbs

- **Slight reservations:** use the following reporting verbs when you are unsure that a text is completely true:

notes	indicates
comments	upholds
asserts	critiques
suggests	emphasises
challenges	declares

Classifications of Reporting Verbs

- **Recognition of other possible interpretation or perspectives on an issue:** use the following reporting verbs to acknowledge that there may be other potential explanation or viewpoints to an issue:

  argues posits proposes reasons implies disputes maintains thinks asserts contends opines considers hypothesises advocates feels theorises

In-text citation

- It is a reference made within the body of the text of an academic essay.
- It alerts the reader to a source that has informed your own writing.
- Every piece of information that came from another source, whether or not it is in your own words must be cited.

In-text citation

- Whatever is cited within the text **must** appear in the reference list, and everything in your reference list **must** be something you have referred to within the text.

Types of in-text citation

There are two basic ways to cite someone's work within a text:

1. Narrative citations

In narrative citations, the names of the authors are mentioned as part of the sentence.

For example:

- Becker (2013) defined gamification as giving the mechanics of principles of a game to other activities.

- Cho and Castañeda (2019) noted that game-like activities are frequently used in language classes that adopt mobile and computer technologies.

Types of in-text citation

2. Parenthetical citations

- In parenthetical citations, the authors are not mentioned in the sentence: just the content of their work.

- The citation is placed at the end of the sentence or clause where you have used their information.

- The authors' names are placed in the brackets (parentheses) with the rest of the citation details.

Types of in-text citation

Example:

- Gamification involves giving the mechanics or principles of a game to another activity (Becker, 2013).

- Increasingly, game-like activities are frequently used in language classes that adopt mobile and computer technologies (Cho & Castañeda, 2019).

Referencing Styles

- The exact format of an in-text citation will depend on the style you need to use.
- Examples of referencing styles include:
  - American Psychological Association-APA style.
  - American Chemical Society -ACS style.
  - American Institute of Physics – AIP style.
  - Modern Language Association –MLA style.
  - Chicago Manual Style –CMS.
  - Council of Biology Editors –CBE style
  - Harvard Style- HS.

APA in-text citation

For APA referencing style, you need:

- author's last name
- year of publication.
- page number (when quoting directly).

Examples:

- Smith (2020) found that "the mice disappeared within minutes" (pp. 29-30).
- The author stated "the mice disappeared within minutes" (Smith, 2020, p. 29).

NB//: Use 'p' to refer to one page and 'pp' to refer to multiple pages as illustrated above.

APA in-text citation

Examples continued:

- It has been observed that "pink fairy armadillos seem to be extremely susceptible to stress" (Superina & Brown, 2011, p. 6).
- Superina and Brown (2011) observed that "pink fairy armadillos seem to be extremely susceptible to stress" (p.6).

NB//:

Use direct quotes if only the exact wording is important, otherwise it is better to paraphrase. Quoting doesn't exhibit your writing ability - all it shows is that you can read.

APA in-text citation

Important things to note:

- If an in-text citation has the authors' names as part of the sentence (narrative citation), place the year in brackets immediately after the name, and use **'and'** between the authors' names.

Example:

Jones **and** Smith (2020)

APA in-text citation

Important things to note:

- If an in-text citation has the authors' names in brackets (parenthetical citation), use **"&"** between the authors' names.

Example:

(Jones **&** Smith, 2020).

APA in-text citation

Important things to note:

- For 3 or more authors, use the first author's surname and **"et al."**

Examples:

- Green **et al.'s** (2019) findings indicated that the intervention was not based on evidence from clinical trials.
- It appears the intervention was not based on evidence from clinical trials (Green **et al.,** 2019).

NB//: if you use *et al.* in your thesis, you **must list all the authors** in your reference list (out-text).

APA in-text citation

Important things to note:

- For multiple citation of works by different authors, arrange the names in alphabetical order and separate by a semicolon.

Example:

(Corbin, 2015; James & Waterson, 2017; Smith et al., 2016).

- For multiple citation of works by the same author, arrange the year from oldest to newest separated by a semicolon.

Examples:

- (Corbin, 2015; 2018)
- (Queensland Health, 2017a; 2017b)

APA in-text citation

Important things to note:

- If you have two authors with the same surname who have published in the same year, then you will need to use their initials to distinguish between the two of them. **Otherwise, do not use initials in in-text citation.**

Example:

(K. Smith, 2014; N. Smith, 2014).

APA in-text citation

Important things to note:

- When quoting, anything that goes beyond **four lines** should be set out in block format.

Example:

Halliday (1985), in his description of the approach adopted in the work indicates that:

> Language has evolved to satisfy human needs – it is not arbitrary. A functional grammar is essentially a 'natural' grammar, in the sense that everything in it can be

explained, ultimately, by reference to how language is used (p.6).

Conclusion

- Every piece of information that came from another source, whether or not it is in your own words must be cited within your academic essay.

- Keep practicing your in-text citation in order to become best at it.

- If you are not sure of how to reference your source within your text, take time to look it up on the internet, your lecture note or in a book containing the information you seek.

Questions?

WEEK 9

- Referencing

Types of referencing styles

End-of-text citation (APA)

Third Edition
Academic Writing
A Handbook for International Students
Stephen Bailey

Outline

Outline

- Introduction
- What is referencing
- Why reference an essay?
- Referencing skills
- Documenting formats/Styles
- What do we reference?
- Acknowledging borrowed material
- The APA style
- How to write the end-of-text references
- Entries
- Conclusion

Introduction

- In the course of writing an academic essay, we make use of other people's work.
- We do this because readers should understand our essays/writings, and match them with what exists in the real world.
- Readers will trust our themes/ideas/results because they relate with what they know about the world in general.

Intro. Cont'd

- In an academic environment, people will need credibility in whatever they write or read. Writers will therefore need certain writing skills in order to incorporate other persons' works into their work. This helps to avoid plagiarism.
- The basic rule, therefore, is that all texts consulted/used should be credited either inside of the essay or at the end of it.
- References (end of text) appear on references page which is usually the last page of an essay/research paper that has been written according to the official style adopted by the academic discipline/institution involved.

What is referencing?

- Referencing is a way of giving credit to individuals/agencies/institutions for their creative and intellectual works that one consulted to support one's project/research/academic work.

- Reference is when we provide detailed description of a document from which information is obtained.

What is referencing? Cont'd

- British Standards BS1629: 1976 and BS5605: 1990 define a bibliographical reference as, "a set of data or elements describing a document, or part of a document, and sufficiently precise and detailed to enable a potential reader to identify and locate it."

- Referencing is when we acknowledge in our academic essays the information we have obtained from texts/documents.

Why Reference our essays?

- It is used to show particular sources;
- it is used to help readers to do further readings;
- it adds credibility to ones work; and, among others,
- may be used to avoid plagiarism.

Referencing skills

- These are the techniques that a writer uses in acknowledging sources. They include the skillful means of paraphrasing, summarizing, quoting, incorporating sources into one's work, and the effective ways of acknowledging or documenting sources.

Documentation formats/How many referencing styles are there?

- The referencing/documentation style is the information necessary for a citation and how the information should be ordered. There are many ways of crediting sources as there are many styles. The ff. are some examples

- **American Psychological Association – APA style.** We shall dwell on this style because that is the style approved by our institution – UPSA.

Documentation formats

- **Modern Language Association - MLA style**
- **American Chemical Society – ACS style**
- **American Institute of Physics - AIP style**
- **Council of Biology Editors – CBE style**

- **Legon Journal of the Humanities - LJH style**
- **Institute for Electrical and Electronics Engineers – IEEE style**
- **Chicago Manual of Style - CMS style**

What do we reference/acknowledge/document?

- Materials taken from journals, articles, and textbooks are the main things that come to mind when we talk about referencing.

- We, however, cite materials from other sources such as radio programmes, speeches and interviews, television programmes, bulletins, newspapers, encyclopaedias, artistic/drama performances, theses, and many others.

Acknowledging borrowed material

- This comes in two ways:
- in-text; and, • out-text forms.

- Our focus will be on the Out-of-text reference since the In-text has been expertly dealt with in last week's (Week 10) lecture

Out-text

- Out-text serves the following purposes:

- This is where the detail information is recorded;
- The information which are not considered directly important in our essays are put here;

- Details of the source of material borrowed are written here.
- Out-text acknowledgement comes in the following forms: Notes, References, Bibliography.

The APA Style

- It is the largest psychological organization in the world.
- This style emphasizes the author and the year of publication because it makes it easier to detect if the sources cited are current.

- It is a guide which is accepted not only by psychology, but many areas of science, communications, education, and business.

APA style…

- Its 7th Edition manual emphasizes the mechanics of academic writing. It is very useful for students especially, as it helps them, among others, to prepare and present scientific facts and figures.
- We will delve into the APA REFERENCES (with some consideration to the latest edition):

How to Write the End of Text References:

A Guide

- The heading of the end of text references is **References** or **REFERENCES**;
- All entries must be published works, unpublished works and works in-press;
- Generally, each entry must begin with the **Surname** of the author of the document used;
- Initials are used for first and middle names only;

- Date follows author names or titles if NO author is identified;

How to Write the End of Text References:

A Guide

- ‘P’ (a single page number) or ‘PP’ (multiple page numbers) is used for page numbers in book chapters or popular periodicals;
- ‘P’ or ‘PP’ is NOT used to indicate page numbers in a professional journal;

- All entries should be arranged in the **alphabetical order** of the surnames of the authors.
- **NO TITLES** are to be included in authors' names; **How to Write the End of Text References:** A Guide...
- Books, Journals, Magazines, Newspapers, Electronic Media and the Internet are entered in different ways;
- Titles of books and periodicals are *Italised;*

- Only first word and proper names/nouns are CAPITALIZED in article titles; and,
- Legal tags of publishing companies' names – eg. Pls., Ltd., Inc., … etc. – should be left out of the entry.

Entries for Books:

- Particular of books required (in serial order): Surname, Initials, Year of publication, Full title of book, edition (if not first edition), Sources. Apply appropriate punctuation.

- **Entries for various types of books**

- **Book with ONE author, first edition**
- Sadat, M. (2020). *A handbook of scholarly writing.* Penguin Books.
- --- A book with two (2) to nineteen (19) authors will follow the same structure and use an ampersand before the final name;
- --- Where there are 20 or more authors, write up to the nineteenth (19th) name and insert an ellipsis (but no ampersand), and then add the final author's name.
- --- There is no need to add the name of the publisher.

Conclusion

- In writing an academic essay, all texts/documents that we consult must be referenced. This brings clarity and credibility to both the writings and the authors.

Conclusion

- The important thing is to make a correct reference to the work of writers one consulted and to be consistent with any style/system of

reference one chooses. As stated above, a reference list will show the following: **The author, date, title, and source.** Each of the four answers the following questions:

- **Author:** ***Who*** is the writer of this work? Gives the format for individual author names and of group author names;
- **Date:** ***When*** was this work published? Format of the date and how to include retrieval dates;
- **Title:** ***What*** is the name of this work? Format of the title and how to include bracketed description; and,

Conclusion…

- **Source:** *Where* can I get this work? Format of the source and to include database information.
- Once we are able to answer these questions we should be able to create a reference list for any type of work.
- As mentioned above, these sources may be presented as an assimilation, a summary, a paraphrase or a quotation.

WEEK 9

End-of-text citation (APA)

Presented by: E. WILLIAMS

Outline

- Introduction
- What is referencing
- Why reference an essay?
- Referencing skills
- Documenting formats
- What do we reference?
- How to write the end-of-text references
- Conclusion

Introduction

- In the course of writing an academic essay, we make use of other people's work.
- We do this because readers should understand our essays/writing-ups, and match them with what exists in the real world.
- Readers will trust our themes/ideas/results because they relate with what they know about the world in general.

Introduction II

- In an academic environment, people will need credibility in whatever they write or read.
- Writers will therefore need certain writing skills in order to incorporate other persons' works into their work. This helps to avoid plagiarism.
- The basic rule, therefore, is that all texts consulted/used should be credited inside of the essay and at the end of it.
- References (end of text) appear on references page which is usually the last page of an essay/research paper that has been written according to the official style adopted by the academic discipline/institution involved.

What is referencing?

- Referencing is a way of giving credit to individuals/agencies/institutions for their creative and intellectual works that one consulted to support one's project/research/academic work.

- Reference is when we provide detailed description of a document from which information is obtained.

What is referencing? II

- British Standards BS1629: 1976 and BS5605: 1990 define a bibliographical reference as, “a set of data or elements describing a document, or part of a document, and sufficiently precise and detailed to enable a potential reader to identify and locate it.”

- Referencing is when we acknowledge in our academic essays the information we have obtained from texts/documents.

Reference Source

Reference sources are:

- books,
- journals,
- Book section,
- Internet sources,
- Newspaper,
- Social Media,
- Personal communication (pc),
- Etc..

Referencing Skills

- These are the techniques that a writer uses in acknowledging sources.
- They include the skillful means of paraphrasing, summarizing, quoting, incorporating sources into one's work, and the effective ways of acknowledging or documenting sources.

Documentation Format

Examples of referencing or documentation format include:

- American Psychological Association - APA style.
- American Chemical Society - ACS style.
- American Institute of Physics – AIP style.
- Modern Language Association – MLA style.
- Chicago Manual Style – CMS.
- Council of Biology Editors – CBE style
- Harvard Style - HS.
- Legon Journal of the Humanities – LJH

What do we reference or document?

- Materials taken from journals, articles, and textbooks are the main things that come to mind when we talk about referencing.
- We, however, cite materials from other sources such as radio programmes, speeches and interviews, television programmes, bulletins, newspapers, encyclopaedias, artistic/drama performances, theses, and many others.

Entries* for Books/Book Format

Surname, F. (Year). *Title.* Publishing Company

Example:

Fuseini, B. (1988). *Algebra made easy for all .* Cash Publication

*** An item recorded, how it is recorded/presented**

Journal Format (JARS)

Surname, F. (Year). Title of the article. *Title of the journal*, Volume number (issue number), page range.

Example:

Agyekum, K. (2011). The ethnopragmatics of Akan palace language. *Journal of Anthropological Linguistics*, 67 (4), 573-593.

Book Section

Surname, F. (Year). Title of the *section*. *In Name(s) of the editor(s) (ed.(s)), Title of the Book section*, (page numbers). Publisher.

Example:

Amuzu, E. (2002). The Ewe-English codeswitching. In F. Ameka & E. K. Osam (eds.), *New Directions in Ghanaian Linguistics*, (pp. 147- 171). Black Mask Ltd.

Newspaper article

Surname, F. (Day, Month, Year.) Title of the article. Name of newspaper (italicised), the page number (s).

Example:

Owusu-Ansah, A. (Thursday, April 3, 2006). Attention to English. *Daily Graphic*, p. 6

Internet source/Online

If you use an article from an online source, provide the following:

- author's name
- the year of publication
- the title of the article
- the full URL.

Example:

Levin, B. (2003). Objecthood and Object Alternations. www.csli.stanford.edu. ~~(Retrieved from, on: 30th May 2006).~~

Internet source/Online II

- **Online Media**
- Mends, E. (2019, April 4). Reconciliation, a must for the world. *The Washington Post,* A1, A4.
- **Facebook page**
- National Park Service. **(n. d.)**. *Home* [Facebook page]. Facebook. ~~Retrieved on January 12, 2020~~, from: https://www.facebook.com/nationalparkservice/
- **Online-only supplemental material to a journal article**
- Tawfic, M. (2019). General fasting among humans: Spiritual and physical benefits [Supplemental material]. *Journal of Comparative Psychology, 133*(2), 141-141. https://doi.org/10.1037/com0000181

Internet Source/Online III

- **PowerPoint slides available online**
- Jones, J. (2016, March 23). *Guided reading: Scholarly writing* [PowerPoint slides].
- SlidesShare. https://www.slideshare.net/hellojenjones/guided-readingmaking-the-most-of-it
- **Radio Broadcast References**
- Monney, A. (2020, March 15). *Harassment of Journalist in Africa.* [Radio broadcast]. GBC.

Other Sources

- **The Bible**

  New American Standard Bible. (1995). Loukmann Foundation.

- **Unknown author**

  Webster's English Dictionary. (1991). Random Foundation.

Conclusion

In writing an academic essay, all texts/documents that we consult must be referenced. This brings clarity and credibility to both the writings and the authors.

Conclusion II

- The important thing is to make a correct reference to the work of writers one consulted and to be consistent with any style/system of reference one chooses. As stated above, a reference list will show the following: **The author, date, title, and source.** Each of the four answers the following questions:
- **Author:** ***Who*** is the writer of this work? Gives the format for individual author names and of group author names;
- **Date:** ***When*** was this work published? Format of the date and how to include retrieval dates;
- **Title:** ***What*** is the name of this work? Format of the title and how to include bracketed description; and,

Conclusion III

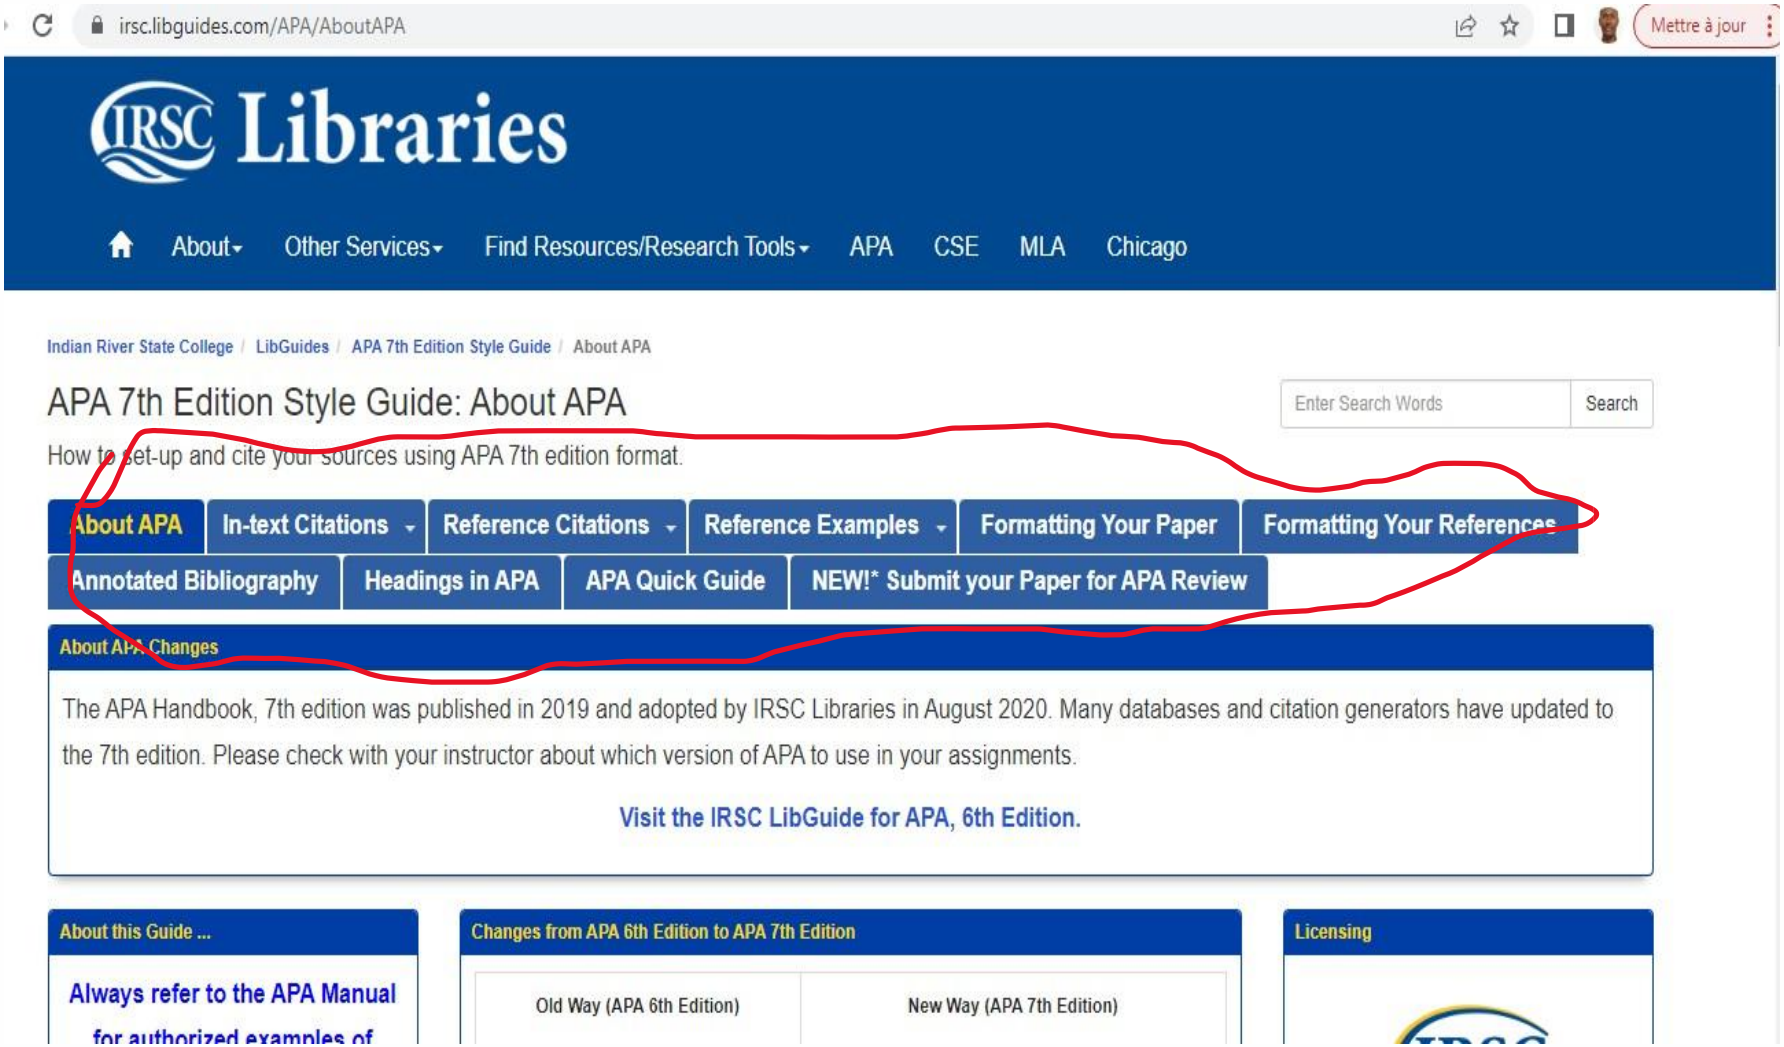

- **Source:** *Where* can I get this work? Format of the source and to include database information.
- Once we are able to answer these questions, we should be able to create a reference list for any type of work.
- As mentioned above, these sources may be presented as an assimilation, a summary, a paraphrase or a quotation.
